

Airthings Teams Up with Planon to Improve Workplace Indoor Air Quality

Fort Worth, Texas (September 21, 2023) — Airthings, the global leader in indoor air quality monitoring and energy-saving solutions, has joined forces with Planon, the leading global provider of integrated workplace management solutions, to improve air quality in offices across the US.

As concerns about indoor air quality and its impact on health have grown exponentially after the pandemic, there is an increasing need for solutions that can monitor and optimize indoor air quality in real-time. Through the partnership, Planon will integrate data and analytics from Airthings, allowing its users to make informed decisions about health risks, wellness, productivity, and sustainability of their buildings and workspaces.

"We believe this partnership between Planon and Airthings is a valuable and natural combination of our solutions – and in high demand right now in the market," said Darlene Pope, President of Planon North America. "By integrating Planon's reporting and analytics capabilities with Airthings' cutting-edge IAQ sensors, we are able to provide our customers with actionable insights that enable healthier and more comfortable workplaces."

"We are very proud to be a partner with leading solution providers like Planon," said JJ Baird, Director of Strategic Partnerships at Airthings. "Our mission at Airthings is to help the world breathe better, and we are proud to work with partners who share these common goals."

The Airthings for Business solution helps building owners and facility managers make informed decisions using real-time indoor air quality data. Set up in a matter of minutes, the wireless monitors run on long-lasting batteries, making the solution easy to scale and customize to any new or existing space.

About Airthings

Airthings is the global leader in indoor air quality and energy-efficiency solutions for homeowners, businesses, and professionals. Founded in 2008, Airthings is on a mission to ensure that people around the world recognize the impact of indoor air quality and take control of their health through simple, affordable, and accurate technology solutions while optimizing energy consumption in buildings. Airthings' products have made radon detection and indoor air quality monitoring easy to deploy, accurate, and user friendly, and have received several accolades including the TIME's Best Inventions award and CES Innovation Award Honors. Headquartered in the heart of Oslo, Norway, and with offices in the US and Sweden the company has over 130 employees from more than 35 nationalities—and counting. To see the full range of Airthings indoor air quality monitors and radon detectors or to learn more about the importance of continuous air quality monitoring, please visit airthings.com
