

Airthings Announces Partnership with Soter Technologies *Collaboration designed to improve air quality in school, offices across US*

OSLO (Dec. 13, 2023) – Airthings – the global leader in indoor air quality monitoring and energy-saving solutions – has announced a new partnership with Soter Technologies, a leading provider of innovative environmental sensor and software technology. This agreement integrates the Airthings for Business solution into Soter’s portfolio to support Soter’s FlySense® devices.

This partnership will include both domestic and international markets from the US-based operations for Soter, bringing Airthings’ technology to the existing platform. Airthings technology is capable of monitoring radon, particulate matter (PM), volatile organic compounds (VOCs), carbon dioxide (CO₂), humidity, temperature and pressure, as well as noise and light. These sensors deliver live measurements to the Airthings dashboard for analytics and insights.

Soter’s technology builds upon Airthings’ with the FlySense vape detection platform – which is designed to detect the chemical signature of emissions from vape pens, and issue autonomous alerts utilizing a range of network connectivity options. FlySense devices are inherently privacy aware and do not pose any risk to occupants in areas such as locker rooms and bathrooms. This partnership inherently creates a comprehensive and competitive indoor air quality monitoring service for various markets, including education, commercial, real estate and entertainment venues.

“Air quality in the education setting is paramount to the mission here at Airthings,” said Oyvind Birkenes, CEO of Airthings. “We know that by increasing air quality, we are happier, more productive and have greater health overall. This partnership exemplifies a unified mission for these outcomes.”

“Airthings’ robust line of monitoring devices are proven in their ability to accurately monitor air quality in the education environment,” said Derek Peterson, CEO of Soter. “We are eager to work with a trusted partner at a time when indoor air quality is top-of-mind for so many organizations and their constituents.”

###

About Airthings

Airthings is a global technology company and producer of award-winning radon and indoor air quality monitors for homeowners, businesses, and professionals. Founded in 2008, Airthings is on a mission to ensure that people around the world recognize the impact of indoor air quality and take control of their health through simple, affordable, and accurate technology solutions while optimizing energy consumption in buildings. Airthings’ products have made radon detection and indoor air quality monitoring easy to deploy, accurate, and user friendly, and have received several accolades including the TIME’s Best Inventions award and CES Innovation Award Honors. Headquartered in the heart of Oslo, Norway, and with offices in the US and Sweden the company has over 140 employees from more than 30 nationalities—and counting.

About Soter Technologies

Ronkonkoma, New York-based Soter Technologies is committed to protecting the health and wellbeing of students and the public with advanced technology and creative solutions. Using advanced sensor and software technology, Soter Technologies develops and delivers innovative solutions for environmental intelligence to make the world a safer place, from schools to enterprises to public spaces. Taking a holistic approach to safety and security, Soter provides technology tools to detect and deter without invading privacy. The company was founded as Digital Fly® in 2015 and was focused on social media awareness. Soter is the first in the world to introduce a vape and bullying detection and alert system for schools – FlySense® Vaping & Elevated Sound Detector. The company's technology has been embraced by schools across the United States and around the world. The Soter name is inspired by Greek mythology wherein Soter is the personification of safety, deliverance, and preservation from harm. For more information about the company, its services, and products visit: www.sotertechnologies.com.
